

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Growth, a sub-fund of DSM Capital Partners Funds

Class I2-AUD (Accumulation) LU1557160451

Management Company: FundRock Management Company S.A.

Objectives and Investment Policy

Objective: The Fund seeks long-term capital appreciation.

The Fund is active and its benchmark is the MSCI ACWI Net. The majority of the Fund's equity securities will be components of the benchmark. The Investment Manager may use its discretion to invest in companies not included in the benchmark in order to take advantage of specific investment opportunities. The Fund does not restrict the extent to which the portfolio holdings may deviate from the benchmark.

Investment Process: The Fund's investment team uses a bottom-up, idea driven, growth style with a long-term investment horizon, coupled with a distinct valuation discipline. The team seeks to identify companies, one by one, which have growing businesses, impressive fundamentals, above average profitability and successful managements. Companies typically have 10% or better historical revenue and earnings growth, generate free cash flow and have attractive financial returns that are stable or rising. The Investment Manager's view of the world informs its company choices and position size.

Under normal circumstances, the Fund will invest its net assets in equity securities of large capitalization companies. Equity securities, as determined by the Investment Manager in its discretion, include, but are not limited to, common stocks, preferred stocks, securities convertible into common stocks, rights and warrants. The Fund has no limit on the amount of its assets it can invest in equity securities of domestic or foreign companies, including those in emerging markets. A large capitalization company is one that has a market capitalization of more than USD 10 billion at the time of the investment. The Fund may also invest up to 40% of its net assets in equity securities of companies that have a market capitalization below USD 10 billion at the time of the investment. The Fund generally will contain 25 to 50 positions.

The Fund may, from time to time, have significant exposure to one or more issuers, industries, geographic regions or sectors of the global economy. The Fund may invest greater than 25% of its net assets in the following sectors: consumer discretionary, consumer staples, energy, financials, health care, industrials, materials, technology and telecommunications services.

The Fund promotes ESG by investing in companies with strong revenue growth, stable earnings stream and quality management teams, with consideration given towards the companies' environmental, social and governance characteristics according to article 8 of SFDR.

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The net investment income of the Fund will neither be declared nor distributed. However, the Net Asset Value per Share of the Fund will reflect any net investment income or capital gains.

Shares can be bought and sold back to the Fund on any business day in Luxembourg.

Please refer to the Prospectus for more detailed information.

Risk and Reward Profile

With lower risk, With higher risk,
 ←.....→
 potentially lower rewards potentially higher rewards

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Due to insufficient historical data, the risk indicator incorporates simulated data based on a reference portfolio.

The Fund is ranked in risk and reward category 5 as it can invest in equities, which tend to be more volatile than cash.

The Risk and Reward Indicator does not take into account the following:

Growth Stocks Risk: Prices of growth stocks tend to be higher in relation to their companies' earnings. Growth stocks may be more sensitive to market, economic and political developments than other stocks which make their prices more volatile.

Liquidity Risk: The Fund is invested in markets that may be affected by a decrease in liquidity. Such market conditions would impact the prices at which the Investment Manager opens and closes positions.

Investment Risk: The Fund may not achieve its investment objective. An investment in any Fund involves investment risks including possible loss of the amount invested.

Operational Risk: There is no guarantee that the Fund will meet its investment objective. Neither the Investment Manager, nor any other party guarantees the performance of the Fund, nor do they assure that the market value of an investment in the Fund will not decline.

Concentration Risk: To the extent that the Fund's investments are concentrated in a particular company, the Fund may be susceptible to losses due to adverse occurrences affecting that company, industry, or sector.

Currency Risk: Fluctuations in exchange rates may cause the value of the Fund's investments to decline.

Stock Connect: Stock Connect is a new trading platform and the relevant regulations are untested and subject to change. Investments through the Stock Connect are subject to additional risks, including amongst others, quota limitations, restrictions on selling, ownership of securities applicable to certain rules, participation in corporate actions and shareholders' meetings, differences in trading day, operational risk, recalling of eligible stocks and trading restrictions, trading costs (including tax), local market rules, foreign shareholding restrictions and disclosure obligations, clearing, settlement and custody risk, currency risk and default risk.

For full details of the Fund's risks, please see the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
Charges taken from the Fund over a year	
Ongoing charge	0.70%
Charges taken from the Fund under specific conditions	
Performance fee	None

The management charge is fixed and other Fund expenses are capped. Up to and until 31 December 2026, to the extent that the Ongoing Charges per Class exceed the percentage for each Class noted below during any financial year, such excess amount shall be paid by the Investment Manager, subject to recoupment by the Investment Management over a period not exceeding five years. For the avoidance of doubt, the recoupment will not lead to the aforementioned Ongoing Charges being exceeded. The Investment Manager may decide on a voluntary basis to extend year by year the above-mentioned period in which it will pay such excess amount.

The entry and exit charges are the maximum charges and the investors may pay less.

The ongoing charges figure is an estimate based on the expected total of charges. This figure may vary from year to year.

This figure does not include portfolio transaction costs (other than entry and exit charges, if any, on investments in other collective investment schemes).

For more information about the charges please refer to the relevant section of the Sub-Fund's Appendix. The Prospectus is available under <https://dsmcapital.com/disclaimer-agreement/>.

Past Performance

Class with period of inactivity.

Practical Information
